A technical diagram of a bridge pier's cross-section. It features a central vertical column with horizontal top and bottom plates. A red horizontal band labeled "Clé d'aile en CTP" spans across the top plate. Below it, two blue horizontal bands labeled "Contre-clé" are positioned on the top and bottom plates. Reinforcement bars, represented by thick grey vertical lines, are shown at the corners and along the edges of the pier. Numerical values 10, 6, and 80 are placed near the bottom reinforcement bar.
